READY-MADE SYSTEM

Online reservations and booking

For restaurants, inns, clinics, salons and barbershops. Customers pick a day and time on their own, around the clock, and your staff confirms with one tap.

Demo with a fictional restaurant. Your version uses your name, photos, hours and capacity.

WHY A WEBSITE

Social media gets attention. A website gets customers.

People who don't know you yet search on Google. A website turns that search into a customer, without anyone having to answer messages right away.

1

Show up on Google

Your name, services and address appear when people search in your town, not only to your followers.

2

Build trust

Your own website shows you're a serious business. That matters when customers compare you with a competitor.

3

Sell after hours

Bookings and quote requests come in at 11 PM on a Sunday, with nobody on your team online.

4

Organized leads

Every request arrives with a name, phone number and what the customer needs. Nothing gets lost in your inbox.

> **Your service is already good. A website helps more people find out.**
